Présentation

OVERVIEW

The Advanced Master in Air Transport Management offers a systematic approach to Air Transport examining it from the viewpoints of economy, operational working methods, marketing and financial strategies.

There are many needs for high-level specialists with a strategic vision and capable of driving change.

The Air Transport industry - airlines, airport infrastructures - is evolving in a fast-changing environment, marked by strong global competition, increasingly complex financial issues and heightened safety and security challenges.

In this sector, there is a great need for high-level specialists with a strategic vision and the ability to lead change
