

ADVANCED MASTER IN AIRLINE MANAGEMENT

IN BRIEF

Type of diploma : Advanced Master®

Ministry field(s) : Science and Technology

Presentation

OVERVIEW

The training course aims at giving the participants:

- Technical skills in the field of airline operations,
- Management skills by developing methodological and organizational proficiencies in several areas close to aircraft operations (safety, maintenance, training, stations).

It focuses on:

- Sustainable development
- Economics
- Corporate management
- Airline operational efficiency
- Safety management

Objectives

At the completion of the master program, participants will be able to:

- Apply basic technical knowledge to make better decisions in aircraft operations
- Select global strategic approaches for operations
- Define the needs for improving the decision-making capabilities in the field of airline operations
- Apply critical thinking and research skills through case studies, simulations, and other problem-solving activities

Training content

The Mastère Spécialisé®, also called Advanced Master is a post-graduate specialization degree created by the French Conférence des Grandes Écoles.

This program includes formal teaching and the preparation of an individual thesis.

An academic part:
